USSR

50X1-HUM

USSR National Economy in 1953 50X1-HUM

it appears that: a) the fifth 5-year plan is working out quite well, except in agricultural field; b) it will take entire period of 5 years to fulfill the plan; c) production is lagging in rolled steel products, pig iron, zinc, lead, coal, petroleum, caustic soda, synthetic fertilizers, generators and electric motors, agricultural machinery, textile machinery, rolling mills equipment, building material, and some food items; d) Soviet production is increasing at a slower rate; e) production costs have almost been lowered to the point desired by the planners; f) agricultural production is below expectations and is insufficient for the needs of the country; g) in spite of assertions to the contrary, investments for the production of capital goods for heavy industry have been falling off to some extent; h) the sale of food items has not reached the quota set by the planners, but the contrary is true for manufactured goods; i) productivity of labor is almost reaching a level above which it is difficult to go; j) the cultural development of the Soviet people seems to be satisfactory.

In 1953 the labor force increased by 3,000,000 persons, compared to an increase of 900,000 in 1952. It is also reported that the number of graduates from trade schools in continuing to drop. 50X1-HUM
